508-289-2691 jfarrar@whoi.edu

Research Interests

Air-sea interaction and exchange; dynamics and thermodynamics of the upper ocean; tropical dynamics and equatorial waves; oceanic internal waves and eddies; satellite oceanography; ocean observing and instrumentation.

These interests are pursued from an observational perspective using in situ observations, satellite observations, and, in some cases, laboratory and numerical models to test hypotheses and test or formulate simplified physical models that aid understanding.

Education

Massachusetts Institute of Technology-Woods Hole Oceanographic Institution Ph.D., Physical Oceanography (February 2007) (S.M., September 2003)

Supervisor: Robert A. Weller, Ph.D., Woods Hole Oceanographic Institution.

Ph.D. thesis title: Air-sea interaction at two contrasting sites in the eastern tropical Pacific: mesoscale variability and atmospheric convection at 10° N.

GPA 4.5/5.0 (equivalent to 3.5/4.0)

University of Oklahoma

B.S., Physics B.A., Philosophy (June 2000)

Supervisor: Eric Abraham, Ph.D. (Physics Department)

Thesis title: Design and Construction of a Magneto-Optical Trap for Demonstration of Bose-Einstein Condensation.

GPA 3.87/4.0

Selected Academic Honors:

Outstanding Student Paper Award, 2006 AGU Ocean Sciences meeting

MIT Presidential Fellowship, 2000-2001

Most Outstanding Physics Student, U. Oklahoma, 2000

Phi Beta Kappa

Golden Key National Honor Society

Sigma Pi Sigma (physics honor society)

National Merit Scholar

Employment

Assistant Scientist (7/2008 to present), Woods Hole Oceanographic Institution Postdoctoral Investigator (11/2006 to 6/2008), Woods Hole Oceanographic Institution Graduate Research Assistant (09/2004-11/2006 and 06/2000-08/2003), WHOI Research Associate I (09/2003-08/2004), Woods Hole Oceanographic Institution Student Laboratory Assistant (1998-2000), Magneto-optical trapping laboratory (atomic-molecular physics), Physics Department, University of Oklahoma Research Intern (Summer, 1998), Indiana University Cyclotron Facility

Field experience

2010: King Abdullah University for Science and Technology mooring recovery cruise, SETE3 (tug) and SETE30 (barge); Durrat (Saudi Arabia) to Durrat (Red Sea). Chief Scientist.

2009: King Abdullah University for Science and Technology mooring recovery/redeployment cruise, SETE3 (tug) and SETE30 (barge); Durrat (Saudi Arabia) to Durrat (Red Sea). Chief Scientist.

2008: King Abdullah University for Science and Technology mooring deployment cruise, RV *Oceanus*; Jeddah (Saudi Arabia) to Jeddah. Chief Scientist.

2008: Northern Tropical Atlantic Station mooring turnaround cruise, RV *Oceanus*; Woods Hole, MA to Barbados. Chief Scientist: Al Plueddemann.

2007: CLIMODE and wave-measurement test mooring recovery cruise, RV *Oceanus* (Co-PI with Robert Weller). Participation in planning and execution of a dragging operation to retrieve remnants of a mooring that had previously failed in the Gulf Stream. Chief scientist: Robert Weller.

2007: Wave-measurement test mooring, RV *Oceanus* (Co-PI with Robert Weller). Chief Scientist for mooring deployment cruise in coastal waters south of Martha's Vineyard, MA.

2003: Coupled Boundary Layers and Air-Sea Transfer Experiment, Low Winds, FV *Nobska* (PI, Robert Weller). Chief Scientist for 3 of 5 cruise legs.

2001: Salt Finger Tracer Release Experiment, RV Oceanus; Barbados to Barbados. SF₆ tracer release and microstructure sampling, Chief Scientist: Raymond Schmitt.

Seminars

September 2006, Massachusetts Institute of Technology, Oceanography and Climate Sack Lunch Seminar. Oceanic mesoscale variability and atmospheric convection on $10^{\circ}N$ in the eastern Pacific.

February 2007 (Invited), National Data Buoy Center. Buoys and wave-measurement requirements of the WHOI Upper Ocean Processes Group.

April 2007 (Invited), Lamont-Doherty Earth Observatory, Ocean and Climate Physics Seminar. Oceanic mesoscale variability and atmospheric convection on $10^{\circ}N$ in the eastern Pacific.

June 2007 (Invited), Geophysical Fluid Dynamics Program Staff Lecture, Woods Hole Oceanographic Institution. *Modulation of the cool skin of the ocean by internal waves* (with C.J. Zappa and C. Cenedese).

July 2007 (Invited), Geophysical Fluid Dynamics Program, Mini-Symposium on "Ocean Bottom and Surface Boundary Layers", Woods Hole Oceanographic Institution. *The ocean's diurnal boundary layer: observations and models.*

October 2007, University of Oklahoma, Department of Meteorology, Seminar series in convection and numerical weather prediction. Oceanic mesoscale variability and atmospheric convection on $10^{\circ}N$ in the eastern Pacific.

October 2007 (Invited), University of Oklahoma, Department of Physics Colloquium Series. Planetary-scale equatorial waves in the Pacific Ocean and mathematical analogy to the quantum simple harmonic oscillator.

November 2007, Woods Hole Oceanographic Institution, Physical Oceanography Seminar. Observations of equatorial waves in the Pacific Ocean: Dispersion characteristics, meridional sea-level structures, and a previously unobserved wave mode.

November 2007 (Invited), Oregon State University, Physical Oceanography Seminar. Observations of the dispersion characteristics and meridional sea-level structure of equatorial waves in the Pacific Ocean.

November 2007, Oregon State University, Joint Physical Oceanography and Atmospheric Sciences Seminar. Oceanic mesoscale variability and atmospheric convection on $10^{\circ}N$ in the eastern Pacific.

April 2008, Woods Hole Oceanographic Institution, Physical Oceanography Seminar. Equatorial and tropical instability waves: synthesis and new observations.

June 2008, Oregon State University, Physical Oceanography Seminar. Equatorial and tropical instability waves: synthesis and new observations.

September 2009, Texas A&M University, Department of Atmospheric Sciences Seminar. Oceanic mesoscale variability and atmospheric convection on $10^{\circ}N$ in the eastern Pacific.

September 2009 (Invited), Texas A&M University, Department of Oceanography Seminar. *Observations of the dispersion relation and meridional structure of equatorial waves and tropical instability waves.*

October 2009 (Invited), Woods Hole Oceanographic Institution, Applied Ocean Physics and Engineering Coastal Ocean Fluid Dynamics Laboratory Seminar. *Air-sea exchange in the Red Sea and the role of coastal processes.*

December 2009 (Invited), University of Rhode Island, Graduate School of Oceanography Seminar. Observations of the dispersion relation and meridional structure of equatorial waves and tropical instability waves.

February 2011 (Invited), Rensselaer Polytechnic Institute, Mathematics Colloquium. Observations of planetary-scale ocean waves in the equatorial waveguide.

April 2011 (Invited), University of Massachusetts, Dartmouth, School for Marine Science and Technology. New observations of equatorial waves and tropical instability waves in the Pacific Ocean.

June 2011, Woods Hole Oceanographic Institution, Physical Oceanography Seminar. On the spectrum of equatorial inertia-gravity waves and the significance of zero group velocity (co-delivered with Ted Durland).

Research Funding

A test mooring to develop wave measurement capabilities on WHOI buoys (work complete). Funding source: WHOI Access to the Sea. Co-PI: Robert Weller. This project involved adapting a wave-measurement package developed by the National Data Buoy Center for use on WHOI surface moorings and deployment of a test mooring south of Martha's Vineyard, MA where the response of the buoy to surface waves could be compared to independent measurements of surface waves.

Ensuring the success of future WHOI deep-ocean mooring deployments in harsh environments (work complete). Funding source: WHOI Access to the Sea. Co-PI: Robert Weller. We recovered the remnants of a failed surface mooring that was deployed in the Gulf Stream (as part of the CLIVAR Mode Water Dynamics Experiment) so that the failure mode could be identified and prevented.

KAUST- Coastal meteorological tower and air-sea interaction mooring (11/2007-10/2012). Funding source: King Abdullah University of Science and Technology of Saudi Arabia. Co-PI: Robert Weller. The proposal was to deploy a heavily-instrumented air-sea interaction mooring in the Red Sea and an instrumented meteorological tower on the coast. This is part of a larger effort to study the physics and biology of the Red Sea, and these measurements are being interpreted in conjunction with modeling and observational efforts by other PIs.

Moored observations of turbulent kinetic energy dissipation in and below the mixed layer during VOCALS (03/2008-2/2011). Funding source: NSF. Co-PIs: Christopher J. Zappa (LDEO) and Robert Weller. This project equipped an existing, heavily-instrumented surface mooring with pulse-to-pulse-coherent Doppler sonar instruments to estimate dissipation of turbulent kinetic energy. Virtues of the approach are that the technique is insensitive to platform motion and that the deployment configuration avoided measuring the turbulent wake of the mooring. The measurements were successful, providing a 9-month time series of dissipation in the open ocean together with the complementary measurements needed to connect the dissipation to other physical processes.

Satellite and in situ observations of equatorially trapped waves (work complete). Funding source: Tropical Research Initiative of the WHOI Ocean Life Institute. Co-PI: Robert Weller. This effort continued my work on Pacific equatorial waves, extending the analysis to higher frequencies and other oceans.

Formation of multiple zonal jets in the oceans (4/2009-03/2012). Funding source: NSF. Co-PIs: Igor Kamekovich and Pavel Berloff. This project involves study of "zonal jets", or zonally elongated features in mean properties, using theory, numerical modelling, and observation. My role on the project is to perform identical analyses of satellite sea-level observations and GCM output in an attempt to confirm or disprove the existence of the "jets" and test hypotheses about their dynamics.

Oceanic response to atmospheric forcing in the Kuroshio Extension (10/2008-09/2011). Funding source: NSF. Co-PIs: Luc Rainville, Nick Bond, Jae-Hun Park, Steven Jayne. This project uses data from the KESS experiment to study forcing and evolution of near-inertial waves in a strong mesoscale flow field.

Observations and analysis of deep equatorial variability in the Atlantic (3/2009-02/2013). Funding source: NSF. Co-PI: John Toole (and in collaboration with Peter Brandt, Carsten Eden, and Marcus Dengler of IFM-GEOMAR). An array of McLane Moored Profilers has been deployed in the equatorial Atlantic, and the data will be used to study deep equatorial waves and vertically-alternating zonal currents that have been observed in a pilot experiment and previous observations.

Covariability of wind and sea surface height in the Pacific (7/2010-06/2014). Funding source: NASA (subcontract from Oregon State Univ.). Co-PIs: Theodore Durland and Dudley Chelton. The goal of this project is to examine wind forcing of equatorial waves in altimeter and scatterometer data. With careful consideration of the satellite sampling characteristics, we expect to address variability at periods as short as 4 days.

Toward a Salinity Budget for the Ocean Salinity Field Campaign (4/2011-03/2014). Funding source: NASA. Co-PIs: Albert Plueddemann and James Edson (U. Conn.). This project will deploy a surface mooring in the North Atlantic subtropical gyre to make direct measurements of turbulent surface fluxes and measurements of surface meteorology and oceanic temperature, salinity, and velocity.

Professional Activities

Educational activities

Thesis committee member for: Ping Zhai (MIT-WHOI, S.M. and Ph.D.), Sudip Majumder (U. Mass., Ph.D.), Neeti Neeti (Clark Univ., Ph.D.)

Member of MIT-WHOI Joint Committee for Physical Oceanography (a graduate program oversight committee), 2011-present

Member of WHOI Joint Program Admissions Committee, 2010-present

2012: Hosted a field trip to WHOI by undergraduate students in the Sea Education Association SEA Semester program, including a presentation and tour of labs in the Physical Oceanography Department.

2010: Summer (i.e., interim) advisor to MIT-WHOI Joint Program graduate student (Deepak Cherian).

2009: Advisor to two undergraduate summer students and one visiting graduate student.

2007: Co-advisor (with Dr. Claudia Cenedese) to Andrew Wells, a summer student fellow of the WHOI Geophysical Fluid Dynamics Program and graduate student in the Department of Applied Mathematics and Theoretical Physics at the University of Cambridge. This involved guiding and supervising Mr. Wells during his theoretical and laboratory study of the effect of surface divergence on the cool-skin effect.

2007: Delivered to undergraduate physics majors at the University of Oklahoma a presentation entitled "Physical oceanography, an alternative career pathway in physics".

2006-2011: Guest lecturer for *Introduction to Physical Oceanography* (MIT-WHOI graduate course 12.808) on measurement of surface meteorology and air-sea fluxes at sea.

2003-2006: Volunteered to mentor a student at Falmouth High School (MA) who was deemed at risk of dropping out of school or engaging in other self-destructive behavior. I met with the student weekly. In addition to providing personal and academic guidance, I fostered his interest in automotive repair.

2005: Hosted a field trip to WHOI by the Children's School of Science (Woods Hole, MA) meteorology class. This included a lecture on meteorological measurements at sea, discussion of students' design of an instrumented meteorological raft, and a tour of several laboratories at WHOI.

Service

Member of International CLIVAR Atlantic Implementation Panel, 2011-present

Member of US CLIVAR Process Study and Model Improvement Panel, 2012-present

Member of SPURS (Salinity Processes in the Upper-ocean Regional Study) Science Steering Committee, 2011-present

Member of WHOI Search Committee for Physical Oceanography Department Chair, 2010

Member of WHOI Search Committee for Vice President of Marine Operations, 2008-2009

Member of WHOI Diversity Committee, 2008-2010

WHOI Postdoctoral Association (Secretary), elected representative of the physical oceanography department, 2007-2008

Member of WHOI's Gender Equity Program Advisory Committee, 2004-2006

President, Sigma Pi Sigma (physics honor society), U. Oklahoma Chapter, 1999-2000

Reviewer for Geophysical Research Letters, Journal of Physical Oceanography, Journal of Geophysical Research, Ocean Science, Journal of Atmospheric and Oceanic Technology, Climate Dynamics, Deep Sea Research, Journal of Earth System Science and Oceanologia

Proposal reviewer for UK Natural Environment Research Council

Proposal reviewer for National Science Foundation

Panel reviewer for National Science Foundation (2010)

Panel reviewer for National Oceanic and Atmospheric Administration (2010)

Membership in Professional Societies

American Geophysical Union, American Meteorological Society, American Association for the Advancement of Science
